  - **Relevant Coursework** - HTML 5 & CSS 3, Bootstrap, JavaScript, JQuery, GitHub, Heroku and Ruby on Rails.
  - **Honors & Awards:** Received recognition from class mentor for quick ability to understand and implement new skills.
- 

## WEB DEVELOPMENT EXPERIENCE

---

### RUBY ON RAILS

Developed an E-Commerce web application to showcase and sell products.

- Wrote code on a Github repository using different branches for individual sections of web app.
- Experienced with Heroku as a production environment and with Heroku add-ons.
- Created users, products, and pages using scaffolding, database migrations.
- Enabled administrator login to create and maintain products and monitor user reviews.
- Added comments and reviews to products that include validation and pagination.
- Installed Rspec and wrote both unit and functional tests.
- Used AJAX to send and fetch only data needed without reloading the page everytime.
- Implemented and tested Fragment, Russian doll, and Memcached caching techniques.

### JAVASCRIPT

- Created functioning calculator with hover effects.
- Experience with arrays, including displaying images and titles with border styling.
- Wrote functions to validate email input forms and display number of characters in the forms.
- Knowledge in linking and using JQuery library. And with using API's.

### HTML 5 & CSS 3

- Designed and developed personal portfolio web page.
  - Used display and positioning properties, the box model, and browser Developer tools.
  - Linked Bootstrap and included its framework, components, and plug-ins.
- 

## ADDITIONAL SKILLS

---

- In-depth knowledge of windows 10 and Mac Operating Systems.
- Experience with postgresql, JSON API, Stripe, and Redis.
